General Information

- Project Name: Stock
- Start Date: July 2023
- Prototype End Date: November 23, 2023
- Project Manager: Nicolas Vieira Pires
- Development Team:
    - Nicolas Vieira Pires - HTML/CSS/PHP/DATABASE
    - Raphael Augusto dos Santos - HTML/CSS
    - Julia - Design/Presentation

Project Objective

The project aims to register and control items in a pantry and provide users with a convenient and efficient way to manage the food and other products stored in their home pantries. The project is constantly evolving, and therefore it should have many more features than this; this is just the initial idea.

Project Requirements

Only one Database and a place to host the website.

Technologies Used

- Primary Language: PHP
- Other Languages: SQL

Project Architecture

All project versions can be found in the Main folder.

We also have the "Front-End" folder, which contains the initial idea of the project's graphical part, and the "Documentation" folder, where you can find project information.

Implementation

At the moment, it is only possible to use "Stock" by hosting a local server.

Working Hours

Not calculated.

Project Costs

There were no costs other than working hours.

Notices

The current version of the project is not prepared for all types of resolutions; it is recommended to use "1920x1080" for better viewing.
